Tillage detection – Launch L4C processor and enabling tillage monitoring

- Launch L4C processor via **CUSTOM JOBS**:
  - **Enabling tillage monitoring** = 1
  - Triggered directly, can select input data (tiles and dates)
Launch L4C processor via **CUSTOM JOBS:**

- **Enabling tillage monitoring = 1**
- Triggered directly, can select input data (tiles and dates)

Or:

- **Through the console:** set the value of "processor.s4c_l4c.tillage_monitoring" **key to 1**, in **config table** (system database)
- Launch L4C processor via **DASHBOARD**: scheduled job, using all data until the scheduled date
